JADEN D SYIEM

FULL STACK DEVELOPER

Meghalaya, *Shillong* jadedsyiem@gmail.com LinkedIn Github Hugging Face

SUMMARY

Full Stack Developer with a focus on delivering impactful results, hungry to learn and provide to real-world problems through efficient code. Passionate about algorithm design and applied research, leveraging frameworks like Python and Node.JS to solve challenges. Proven expertise in event management, cross-team collaboration, and optimizing workflows — whether debugging distributed systems or surviving a sudo rm -rf /* mishap .

Skilled and passionateabout Linux environments, and full-stack frameworks to streamline processes and elevate user experiences.

TECHNICAL SKILLS

Languages : C, C++, Java, Python, JavaScript
Frontend : HTML5, CSS3, Three JS
Backend : Python, Node JS, Express JS
Database : My SQL,Postgre SQL

Designing : Figma, Canva
Tools : Git, GitHub, Linux CLI
Editing : Adobe Lightroom, Adobe Photoshop
Others : Hugging Face, Wire Shark, Algorithms, Open-Source Contributions

EXPERIENCE

- **NEHU| FINAL SEM INTERN** | *Meghalaya,Shillong* *~12 JANUARY 2026 - 31 MARCH -2026*
  - Engineered a full-stack e-commerce platform utilizing JavaScript, React, Node.js, Express, and CSS to deliver a seamless user experience.
  - Developed core functional modules, including secure user authentication, dynamic search, collapsible category filtering, and an end-to-end order placement system.
  - Integrated existing blockchain architecture to support secure transaction protocols and platform data integrity.

- **Datayug Society | WINTER INTERN** | *Meghalaya,Shillong* *~5 JANUARY 2026 - 31 MARCH -2026*
  - Developed and hosted a responsive website using Mobirise and Hostinger to enhance online presence.
  - Produced digital content and social media posts to drive awareness of cyber crime and digital literacy.
  - Managed and curated community workshops, coordinating logistics and educational programming.

- **NIC | SUMMER INTERN** | *Meghalaya,Shillong* *~2 JUNE 2025 - 14 DECEMBER -2025*
  - Developed a web-based logbook system using (JavaScript, HTML, and CSS) at NIC to manage Delivered and Acquired records efficiently.
  - Implemented secure user authentication and account-specific data access using Node.js and Express.js.
  - Designed dynamic data tables with sorting, filtering, and inline editing features.
  - Integrated PDF viewing for seamless document access within the application.
  - Built and managed the backend using Express.js and PostgreSQL, with npm for dependency management.
  - Utilized Hugging Face to enhance application functionality while ensuring data security and reliability.

- **BSNL | SUMMER INTERN** | *Meghalaya,Shillong* *~18 JUNE 2024 - 13 JULY, 2024*
  - Gained foundational knowledge of telecommunications networks, including protocols,routing,and infrastructure management.
  - Observed senior engineers in troubleshooting network outages and optimizing bandwidth allocation.
  - Assisted in routine network audits and documentation of system configurations for future reference.
  - Learned about network security practices and the role of firewalls, switches, and routers in enterprise environments.

PROJECTS

- **F1 Entropy Analyser** | *Python, Fast F1 API*:
  - A Python tool to compute race entropy metrics using the FastF1 data package
  - Processed and analyzed Formula 1 race data with pandas and NumPy, applying statistical methods for insight generation
  - Visualized entropy trends and race dynamics using matplotlib and seaborn for clear analytical interpretation.
- **Poké Guide** | *HTML, CSS, JavaScript* :
  - A fast and lightweight Pokémon reference website to improve load times and usability.
  - Built the frontend using HTML, CSS, and JavaScript, integrating the official Pokémon API for real-time data
  - Optimized API calls and UI rendering to ensure quick search, smooth navigation, and responsive performance.
- **Classic Tetris** | *HTML, CSS, JavaScript* :
  - Engineered abrowser-based Tetriscloneusing JavaScript, featuring collision detection, score tracking, and dynamic grid-based rendering.
  - Designed a pixel-perfect UI with keyboard controls (arrow keys for movement/rotation) and real-time updates for score, level, and next-piece preview.
  - Implemented game logic for tetromino rotation, row clearing, and game-over conditions using object-oriented programming principles.
- **Stellar Death** | *HTML, CSS, Three.JS* :
  - Developed an interactive 3D visualization death of a Star using Three.js, simulating stellar collapse and explosion.
  - Implemented real-time animations and particle systems to enhance visual realism and engagement.
  - Optimized rendering, lighting, and camera controls for smooth performance and effective visual storytelling.

OPEN SOURCE CONTRIBUTIONS

- **Neofetch Configuration**| *Bash Script* :
  - Designeda personalized neofetchsetup todisplay system stats, ASCII art, and hardware details in the terminal.
  - Customized output with color schemes, distro-specific ASCII logos, and selective system info (e.g., kernel version, uptime, GPU). Published the config on GitHub for community reuse, including installation instructions and theme
  - variations.
- **Quick Cap** | *JavaScript, Svelte, Google NLP API* :
  - Built with SvelteforareactiveUI,integratingGoogle'sNatural Language API for sentiment analysis and context-aware caption suggestions.
  - Enhanced by community feedback: Added multi-language support (Spanish/French)
  - Generates quick,easy & creative captions along with hashtags
- **Speed Share** | *Svelte, P2P Algorithms, WebRTC, Cryptography* :
  - Engineered a decentralizedpeer-to-peer(P2P) file-sharingsystemusingSvelte and WebRTC, featuring a custom AES-256-GCM encryption layer for end-to-end security.
  - Designed a hybrid encryption model:
    - Asymmetric RSA-4096 for secure key exchange during peer handshakes.
    - Symmetric AES for encrypting file chunks, reducing overhead by 25% compared to pure asymmetric methods.

PUBLICATION

- **AI Doc Question&Answering System** | ***IEEE Conference*** | **April 2025** | *ieeexplore.ieee.org/10894448*
  - Co -Authored & on designing an NLP framework for automated document generation and context-aware Q&A using transformer models (BERT, GPT). Presented findings to 50+ attendees, addressing technical and societal impacts of AI in documentation workflows.
  - **Summary :** Aims to improve interaction with PDF documents by using the OpenAI Assistant API. The system will leverage natural language processing to parse PDFs, answer questions, summarize content, and help users extract relevant information efficiently.

EDUCATION

- **UG** | KCGCollegeOfTechnology|*Chennai,TamilNadu* *~ 2022-2026*
  - B.E in Computer Science & Engineering GPA: 8.0/10.0
  - **Relevant Coursework:** Data Structures & Algorithms, Software Testing,Web Technologies,UI/UX
- **HSC** | B.K. Bajoria Higher Secondary School |*Shillong,Meghalaya* *~ 2020-2022*
  - Science : Physics,Chemistry,Mathematics & Computer Science combination
  - **Relevant Coursework:** Database Management,Python
- **SSLC** | St' Anthony's School| *Shillong,Meghalaya* *~ 2009-2020*

SOFT SKILLS

- **Communication & Public Speaking:**
  - Participated in college debates, contributing to team discussions and presenting ideas to peers and faculty.
  - Collaborated with classmates to create bidding materials for inter-college competitions, focusing on clear and concise communication.
- **Leadership & Team Collaboration:**
  - Red House Captain: Worked with a team of 30+ students to organize events and foster camaraderie, contributing to a 20% improvement in house rankings.
  - Co-Coordinator, Bits and Bids: Assisted in planning a tech-fundraising event for 100+ attendees, partnering with peers to secure sponsorships and streamline logistics.
- **Adaptability & Problem-Solving:**
  - Programming Club Member: Collaborated with peers to troubleshoot coding challenges during hackathons and club projects.
  - Supported the transition of college events to hybrid formats during disruptions, ensuring inclusive participation for students.

INTERESTS

- **Technology**: Programming club, hackathons,open source contributions, cybersecutity enthusiast.
- **Leadership**: Student governance (House Captain), event planning.
- **Sports:** Basketball,Football,Chess.
- **Others:** Photography.
